StabilizR™ Dampened Movement

StabilizR™
power

Winters' StabiliZR™ Solution

StabiliZR™ gauges are dry gauges that come with a StabiliZR™ dampened movement that eliminates pointer flutter caused by vibration and pulsation. This makes pressure reading much easier. No more worries of fill fluid leaking and compatibility issues with the process media. Gauges can easily be serviced without the hassle of draining and then refilling the case with fill fluid.

StabiliZR™:

- ✓ Dampens vibration and pulsation
- ✓ Eliminates leaks and discolouration
- ✓ Can be used at higher temperatures than glycerin filled gauges
- ✓ Provides ease in reading
- ✓ Reinforced, lightweight design

How it works

The pointer shaft is extended through the back of the movement with a small flat paddle affixed to the end of the shaft. A stainless steel cap filled with silicone is pressed over the end of the shaft, covering the paddle. This creates enough resistance to dampen the pointer and movement just as if the gauge is liquid filled, but without the concerns.

StabiliZR™ Movement is available on the following Winters gauges:

PEM-ZR Series* PFP-ZR Series PFQ-ZR Series* PPC-ZR Series* PN2-ZR Series

What customers are saying about the StabiliZR™ vibration dampening gauges:

"It is one of the best product ideas I have seen all liquid filled gauges leak eventually. This is truly something new and better"

- Montgomery, Alabama, USA

"It quite simply is a better mousetrap, truly innovative. Solved age old problem of leaking gauges."

- Toronto, Ontario, Canada

"Lightweight gauges are a very clear advantage"

- Amman, Jordan

Testing Standards

250,000 cycle tests were performed on StabiliZR™ and glycerin filled gauges side-by-side. The performance of the StabiliZR™ gauges were comparable to those of the glycerin filled gauges.

Reference Gauge Pressure (psi)	Winters PFQ-ZR Series (% accurate)	Winters PFQ (glycerin filled) (% accurate)
100	99.6	99.8
200	99.3	99.2
300	99.8	99.3
400	99.3	99.6
